

The only full service food allergy training and preparedness program for daycares.

In Partnership with the Elijah-Alavi Foundation.

In accordance with Elijah's Law NY, IL, & PA.

We are more than just a course

From beginning to end, you will have on-demand access to both technical support and our food allergy experts who will help you create a **safe environment** for children with food allergies.

What we offer:

(more details on next page)

- The only accredited food allergy training program.
- Hand-holding, on-call support to guide you and your staff through training and certification.
- Low-cost epinephrine (e.g. AuviQs) including prescriptions, refills, shipping, (and expiration alerts.)
- Well-designed food allergy posters for safety reminders and education.
- Playful food allergy placemats for children's safety and education.
- Legal guidance regarding use of epinephrine and Elijah's Law (where applicable).
- Parent education meetings.

Our Services in Detail

To learn more, please visit us @webelay.com
or email us at courses@webelay.com

Food Allergy Training & Certification

With your center's unique needs in mind, our course can be taken either in a group setting all at once or as individuals at one's own pace. Upon completion, staff members will be up to date on the latest food allergy information in order to keep children safe. You and your staff will know what to do to prevent a food allergic reaction in your facility, and if need be, will feel confident to use epinephrine in an emergency.

Food Allergy Posters & Placemats

Our proprietary posters and placemats will add color and delight to your walls while educating staff members and children about the food allergy information that can often be forgotten. Parents will be grateful and relieved to see facilities going the extra mile to keep children safe.

Smart Wall-Mounted Basestation for Epinephrine

Our basestations ensure your facility's epinephrine is safely stored but still visible and accessible in an emergency. The basestation will alert staff if it has been opened and comes equipped with video security to prevent theft.

Low-Cost AuviQ (Epinephrine) Prescriptions

Epinephrine is unfortunately very expensive. Belay's physicians will write prescriptions for epinephrine at a significantly reduced price and will ship them out to your facility. We will refill your prescriptions when needed and remind you of upcoming expiration dates, which are often overlooked.
